EXAMINER'S STATEMENT OF REASONS FOR ALLOWANCE

Election/Restrictions

1. Claims 1, 13, and 25 are generic and allowable. Accordingly, the restriction requirement as to the encompassed species is hereby withdrawn and claims 2, 3, 14, 15, 26, and 27, directed to the species of Figures 12 and 15 are no longer withdrawn from consideration since all of the claims to this species depend from or otherwise include each of the limitations of an allowed generic claim.

In view of the above noted withdrawal of the restriction requirement as to the linked species, applicant(s) are advised that if any claim(s) depending from or including all the limitations of the allowable generic linking claim(s) be presented in a continuation or divisional application, such claims may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

Allowable Subject Matter

2. Claims 1-42 are allowed.
3. The following is an examiner's statement of reasons for allowance:

Regarding claims 1, 8, 13, 20, 25, and 32, the primary reason for allowance is that the prior art fails to teach or reasonably suggest determining the image sensing range of a camera, automatically activating a program for operating a predetermined action associated with the

image sensing range of the camera, wherein the predetermined action is configured to enable the user to actively control an object within the image sensing range.

As for claims 37-42, the primary reason for allowance is that the prior art fails to teach or reasonably suggest determining the image sensing range of a camera, automatically activating a program associated with the image sensing range of the camera, wherein the storage device stores a plurality of programs that are activated upon a changing image sensing range and wherein the program is configured to enable the user to actively control an object within the image sensing range.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to John M. Villecco whose telephone number is (571) 272-7319. The examiner can normally be reached on Monday-Friday.
